

**SPECIAL MEASURING INSTRUCTIONS
FOR OUT-OF-TOWN ATTENDANTS**

To ensure that you receive the size closest to your measurements we require the following five items:

BUST: Measure around largest part of bust and back with bra on (not bra size!)

WAIST: Smallest area in your torso.(Pull tape measure taut). *Not where you wear your jeans!!*

HIPS: Measure around largest part with feet together.

HEIGHT: Without heels. *If you are 5'8" or taller without heels you may need extra length (extra charge)*

NORMAL DRESS SIZE – average department store size.

- 60% is required before ordering.
- There is an additional charge for alterations.
- Please have a friend or someone else measure you for better accuracy.
- Please do not take your measurements too tightly!
Always measure over undergarments for more precise information. Please do not give bra or jeans sizes. If you have a large cup size or broad shoulders or back, the size of the garment may have to be adjusted accordingly.
- We compare your measurements to the manufacturers size chart to determine a size. This size is determined by your largest measurement. (For example, if your bust is a size 8 and your hips are size 10, we must order the size 10).
- **Please note! We are not responsible for measurements not done in this store.**

If you have any questions please call us!
